

## **Goal Area #1 Teaching & Learning**

Goal Statement: To provide authentic hands-on, multimodal and appropriate learning opportunities for students at all levels.

Objectives:

1. Provide differentiated instruction for all students.
2. Expand use of maker space for all students to enrich problem-based learning.
3. Create units of study that address multiple subject areas at all levels.
4. Provide educators with professional development opportunities that are specific to teaching strategies best suited for their student populations.

## **Goal Area #2: The Whole Child**

Goal Statement: To provide programming that addresses the needs of the Whole Child, with a focus on collaboration, social skills & physical needs, and the cognitive development of students.

1. Provide students opportunities for group work and the development of social skills.
2. Provide multi-sensory experiences for students.
3. Provide an emphasis on play-based learning in the elementary grades to develop skills for success in the upper grades.
4. Provide strategies to families to assist students at home.

## **Goal Area #3: Health & Wellness**

Goal Statement: Create an environment of social, emotional, and physical well-being so that students will be able to interact cooperatively with others now and in the future.

Objectives

1. Educate students on the importance of a healthy body and a healthy mind through real-world applications at all levels.
2. Improve indoor and outdoor facilities with an emphasis on mental and physical education
3. Educate students on positive communication strategies with peers
4. Create programs that address positive mental health

## **Goal Area #4: Diversity & Citizenship**

Goal Statement: To provide students a deep understand of cultural diversity and citizenship through making local and global connections.

Objectives:

1. To develop an appreciation of the creation of our national, state and local government while building strong connections with local residents and businesses in the community.
2. To develop an understanding and value of our differences, in order to enhance diversity learning for students.
3. To develop connections with students around the world to broaden the global citizenship of our students.
4. To foster a stronger connection between students and the environment while enhancing knowledge of how to protect it.

## **Goal Area #5: Technology and Facilities**

Goal Statement:

To build the district facilities and technology environments to provide the foundation for the infinite student growth without limitations.

Objectives:

1. Implement a scalable technology environment to allow for exposure to new technologies as they emerge.
2. Utilize the district buildings and grounds in a manner that provides for a more extensive range of extracurricular experiences for students.
3. To enhance and modernize school security and facilities.
