Goal-

Intensify the district's commitment to move forward in an environment that provides students with 21st Century skills and prepares them for success on a global level by incorporating technology into all settings.

Activity	Personnel	Timeline	Resources	Budgeting	Evaluation

STEM/STEAM				supplies	evaluation.
related					
activities.					

Goal 1- Establish a Summer School program for at risk students with option for busing

A summer school (Summer Academic Support Program) has already been established and will continue for the Summer of 2017. Criteria used for enrollment are PARCC scores, Benchmark Scores, Teacher Recommendation and Grades.

Goal 2- Enhance the Step Ahead and Saturday Tutoring program to establish the best possible correlation between student PARCC performance, grades and In-District Benchmark Assessments.

Administration, Team Leaders and Program Supervisors have worked to develop a scale for inhouse benchmark assessments and have begun to compare student progress (for those in the program) to PARCC assessments. Once data from Pearson for 2017 Spring PARCC is available, further adjustments can be made to more closely align results with PARCC.

Goal 3- Restructure SMART time to organize groups of students for enrichment or remedial activities.

Plans are in place to remove SMART time for grade 8 and have students pick between performance music and art. In grades 6 & 7 teachers will be organizing groups for the 17-18 school year for remedial assistance. Students will also be pulled from GATE during this time for enrichment. Performance music is also being added to this time for additional enrichment.

Goal 4- Expand middle school technology education program to incorporate a module on coding and make available during SMART

The middle school Tech Ed. Program continues to transform and has already begun to have students work on coding (programing) with drones and spark bots. We are currently working with the high school to incorporate robotics as one of the main components of the Tech Ed. Program.

Goal 5- Expand after school clubs to include more STEM/STEAM related activities.

NASA Build-It Club has already been introduced in October and has become our most highly attended club. This is a club based strictly on Science and Engineering. In addition, we are looking to start an STEAM Engineering Club and Coding Club for the 2017-18 school year as budget allows. Currently the NASA Build-It Club runs Mondays and Wednesday from October to May.
